EDUCATION

University of Houston

Expected May 2028

Bachelor of Science in Economics · Houston, TX

- **Relevant Coursework:** Microeconomic, Macroeconomics, Statistics, Financial Markets, Principles of Accounting
- **Activities:** Finance Association, Sigma Alpha Epsilon: Head of Talent Acquisition & Executive Secretary Board Member; Texas A&M Idea Challenge Finalist; Industry Insights Panel with Deloitte, JPMorgan, and Kiewit

CERTIFICATIONS

Entrepreneurship & Small Business (ESB)

Certiport / Pearson VUE · Issued
2023

Score: 900 / 1000

- Validated foundation-level mastery across entrepreneurship, opportunity evaluation, venture capital and seed funding, financial management, marketing and sales, and small business operations; directly applicable to early-stage investing and startup analysis.

PROFESSIONAL EXPERIENCE

AT Capital

January 2026 – Present

Co-Founder & COO · Austin, TX

- **Founded AT Capital**, an AI-driven investment research and private equity deal-sourcing platform built to identify high-growth public and private companies, automate multi-stage financial analysis, and support institutional-grade trading and PE investment decisions across equities, startups, and alternative assets.
- Engineered **Atlas**, AT Capital's proprietary AI research engine, which aggregates data from SEC filings, earnings transcripts, market feeds, and startup databases to deliver automated investment theses, competitive benchmarking, and risk-adjusted scoring across **200+ companies simultaneously**; reduced deal screening time by an estimated **65–70%** relative to traditional analyst workflows.
- Architected Atlas's **investment scoring model** integrating 15+ financial and operational signals, including revenue CAGR, gross margin trajectory, TAM penetration, burn multiple, debt/equity ratios, producing ranked deal flow with automated investment memos and one-page portfolio summaries for faster decision-making.
- Built full-stack infrastructure using **Python (pandas, NumPy, scikit-learn)**, **SQL**, **React.js**, **Node.js**, and financial-grade REST APIs; designed a real-time portfolio management dashboard tracking **mark-to-market performance, IRR projections, and position-level attribution** across active holdings.
- Designed and deployed a **scalable data pipeline** capable of ingesting structured and unstructured data from 6+ source categories; architected modular infrastructure to support future third-party client onboarding, fund administration, and institutional LP reporting at scale.

Holistx LLC

June 2022 – August 2024

Co-Founder & Chief Financial Officer · Austin, TX · Texas A&M Idea Challenge Finalist

- Co-founded and operated Holistx, a healthtech startup that reached the finals of the **Texas A&M Idea Challenge**; served as sole CFO overseeing P&L management, capital strategy, investor communications, and all financial reporting across the company's full operating lifecycle.
- Managed a **\$10,000 operating budget** with granular expense tracking, rolling 12-month financial forecasts, and variance analysis; authored funding proposals securing **\$2,500 in competitive external capital**.
- Directed development of a consumer web platform built in **HTML, JavaScript, and Java**, scaling to **5,000+ monthly active users** while maintaining 99%+ uptime and sub-2s average page load times.
- Executed a **multi-channel digital marketing strategy** across Facebook, Instagram, and Google Ads using A/B-tested creative, producing a **20% engagement increase within 90 days** and **10% quarter-over-quarter revenue growth**.

Los Reyes Mexican Restaurant

October 2022 – June 2024

Server & Bartender · Cedar Park, TX

- Resolved **50+ customer escalations per week** and managed **100+ covers per shift**, reducing complaint rates by 20% and improving satisfaction scores by 15%+.
- Consistently exceeded monthly sales targets by **20%** through consultative upselling and relationship-driven service.

SELECTED PROJECTS

QuantForge | Adaptive Quantitative Trading System

2026 – Present

Independent Engineering Project · Python · PostgreSQL · Docker · PyTorch

- Architected and built **QuantForge**, a production-grade adaptive quantitative trading system featuring a full ML training pipeline, live broker integrations, a risk management engine, and interactive dashboards; designed to execute and manage real-world equity strategies end-to-end.
- Engineered a **multi-model ML ensemble** supporting scikit-learn, XGBoost, LightGBM, and PyTorch models with **walk-forward cross-validation**, automated retraining on expanding windows, and model viability gating before deployment; replicating institutional quant research workflows.
- Built a **risk management engine** enforcing sector-level daily loss limits (max 7.5% of portfolio NAV), beta-neutrality constraints, gross/net exposure limits, and position-level attribution using a custom **PortfolioOptimizer** with long-short sleeve support; integrated **Alpaca and Interactive Brokers (IBKR)** broker adapters for paper and live execution.
- Designed full **data infrastructure** on PostgreSQL + TimescaleDB (Docker) with Redis signal caching, SQLAlchemy/Alembic ORM, and a Typer-based CLI supporting 10+ subcommands (**db, data, train, exec, autopilot, features, dash**); built a Plotly/Dash web dashboard and tkinter desktop GUI launcher for non-CLI workflows.
- Implemented **CI/CD pipeline** via GitHub Actions running automated unit tests, linting (Ruff), and type checking (mypy) on every push and pull request; designed modular **autopilot daemon** capable of running continuous retrain-and-trade loops with configurable rebalancing intervals.

AI Private Equity Deal Sourcing Engine

2025

Independent Research & Engineering Project

- Built a standalone **ML-powered PE deal sourcing tool** automating discovery and ranking of acquisition targets using financial health scoring (revenue growth, burn rate, margin profile) and risk assessment frameworks; capable of processing **500+ candidate companies per batch** using Python, scikit-learn, SQL, and financial APIs.

Digital Banking System Architecture

2025

Independent Financial Engineering Project

- Designed a comprehensive **digital banking system simulation** modeling deposit management, loan origination, net interest margin optimization, capital reserve simulation, and credit risk architecture demonstrating applied knowledge of Basel III requirements and liquidity management.

SKILLS & COMPETENCIES

Programming: Python (pandas, NumPy, scikit-learn, XGBoost, PyTorch) · Java · JavaScript (React.js, Node.js) · SQL · HTML/CSS · Git/GitHub

Finance: Financial Modeling (DCF, LBO, Comps) · Private Equity Analysis · Deal Sourcing · Valuation · Options & Futures Trading · Portfolio Management · Investment Research · Budgeting & Forecasting

AI & Data: Machine Learning (XGBoost, LightGBM, PyTorch) · Walk-Forward Validation · Data Pipelines · LLM Integration (Claude API, OpenAI API) · Tableau · Excel (Advanced) · REST APIs

Infrastructure: PostgreSQL · TimescaleDB · VectorDB · Docker · SQLAlchemy · GitHub Actions (CI/CD) · Alpaca API · IBKR

Design & Tools: Figma · Adobe XD · Cursor · Plotly/Dash · Loveable

Certifications: ESB: Entrepreneurship & Small Business | Certiport / Pearson VUE (2024)

LEADERSHIP & ACTIVITIES

- **Head Of Talent Acquisition & Executive Secretary Board Member:** Sigma Alpha Epsilon, Managed a Funnel of 380 candidates with a conversation rate of 15%. Built a multi-year financial roadmap for chapter expansion with a growth of 30% YOY, and developed a full marketing and branding initiative, increasing new member yield by 25%. Also Helped raise over \$5,000 in a semester with community service and helping raise money for the JED foundation, Men's Mental health awareness.
- **Texas A&M Idea Challenge: Finalist:** developed, refined, and pitched Holistx to a panel of judges and investors in a university-wide entrepreneurship competition; competed against 100+ teams from across Texas.
- **Finance Association:** University of Houston: active member engaged in investment analysis workshops, alumni networking, and case-based financial modeling events.
- **Industry Insights Panel:** Participated in structured professional development sessions with representatives from Deloitte, JPMorgan, and Kiewit covering careers in finance, consulting, and infrastructure.
